Gun Violence Assessment of Fatal and Non-Fatal Shootings
January 1, 2021 - December 31, 2022

Contra Costa County: Antioch, Bay Point, Pittsburg, and Richmond, CA
Introduction

To better understand the nature of gun violence within Contra Costa County, the National Institute for Criminal Justice Reform (NICJR) assessed publicly available data sources to develop a report on fatal and non-fatal shooting incidents that took place between January 1, 2021 and December 31, 2022, specifically in the cities of Antioch, Bay Point, Pittsburg, and Richmond, California. NICJR focused on these locations because they experienced gun violence at a higher rate than elsewhere in the county. Between 2021 and 2022, Richmond reported 36 homicides, Antioch reported 21, Pittsburg reported seven, and Bay Point reported three.

Using publicly available data sources, NICJR was able to collect information on 55 fatal and 95 non-fatal shooting incidents that took place in either Antioch, Bay Point, Pittsburg, or Richmond. Though the data are imperfect, they nonetheless provide valuable information about violence within the county.
**Methods**

This report uses publicly available data to characterize the individuals and patterns of gun violence within Contra Costa County, specifically in the cities of Antioch, Bay Point, Pittsburg, and Richmond, over a 24-month period. NICJR obtained data from the Gun Violence Archive, National Gun Violence Memorial, Bay Area Homicide Map, and other online case management record systems.

The Gun Violence Archive, NICJR’s main source for data, uses automated queries to compile relevant information from over 7,500 sources, including local and state police and government agencies, media, and other sources. Data for each incident are verified through an initial research and secondary verification process. The National Gun Violence Memorial serves as a secondary data source to provide supplemental identifying information regarding the incidents obtained from the Gun Violence Archive.

NICJR used data from the Gun Violence Archive and 2021 & 2022 Bay Area Homicide Maps to calculate the total number of homicides committed by gun for each city within Contra Costa County. Antioch, Bay Point, Pittsburg, and Richmond were chosen for analysis in this report based on these calculations.

As a part of data collection and analysis, NICJR checked all data for duplicates and missing information and aggregated age data for each victim and suspect into age ranges of 0–17 years, 18–34 years, and 35+ years.

**Data Limitations**

Detailed information for all 55 fatal and 95 non-fatal shootings was not available. Identifying information is often unavailable for a variety of reasons, including the victim’s right to confidentiality and lack of an identified suspect. Despite the scarcity of some information, NICJR diligently searched multiple sources and has provided the most comprehensive data available. The information that is available still provides a meaningful data sample.

Key Findings

Unless specified otherwise, the following tables and figures present combined findings for Antioch, Bay Point, Pittsburg, and Richmond. Information presented in the maps and graphs that follow is separated by city.

Based on publicly available demographic information, in 2021–2022, 77% of those involved in shootings in Antioch, Bay Point, Pittsburg, and Richmond were Black, 21% were Latino, and 2% were classified as other. Largely, victims and suspects of gun violence were Black males between the ages of 18–34. 10

**Figure 7. Gender Distribution of Victims and Suspects of Gun Violence**
Distribution of Gun Violence by Month

Antioch saw a significant increase in non-fatal shootings during the months of February and March, with 40.4% of non-fatal shootings occurring then. In Richmond, 61% of gun violence took place during the summer months. In Bay Point, 60% of fatal shootings occurred in October and November.

**Figure 8. Fatal Shootings by Month**

**Figure 9. Non-Fatal Shootings by Month**
45.8% of fatal shootings within the cities took place after 6 pm. Nearly 40% of all non-fatal shootings within the cities took place between 6:01 pm and 11:59 pm.

**Figure 10. Gun Violence Incidents by Time of Day**
Geographic Distribution of Gun Violence

In Richmond, 58.3% of all gun violence took place in the 94801 zip code, including 57.1% of non-fatal shootings. Both fatal and non-fatal shootings within Antioch were largely concentrated within the 94509 zip code. Both fatal and non-fatal shootings within Bay Point and Pittsburg were concentrated in the 94565 zip code.

The following maps depict fatal and non-fatal shootings in Antioch, Bay Point, Pittsburg, and Richmond from January 1, 2021 through December 31, 2022. Interactive maps are also available.

Conclusion

Victims and suspects of gun violence in Antioch, Bay Point, Pittsburg, and Richmond from January 1, 2021 through December 31, 2022 were overwhelmingly Black, male, and between the ages of 18–34. Zip codes that saw the majority of gun violence incidents include: 94804 (Richmond), 94801 (Richmond), 94509 (Antioch), and 94565 (Pittsburg). This information about the nature of gun violence in the county will be used to inform the development of a gun violence reduction strategy.
